September 30, 2010

**Position Available: Quality Control Technician**  
**Date Available: October 15, 2010**

Century Industrial Coatings Inc., a paint and coatings manufacturer located in Jacksonville, Texas has a position available for a detail oriented person in the Quality Control Department.

This position requires working in a manufacturing plant environment, performing testing and qualification of finished products and maintenance of data and recordkeeping. Accuracy, precision and attention to detail are traits needed for this position. This position also requires Color Matching and final adjusting of products to standards and physical specifications.

Qualifications for this position:

- The ability to read and understand information contained on Material Safety Data Sheets (MSDS)
- Working knowledge of computers
- The ability to read, understand and perform testing procedures, standards and specifications.
- Comfortable working with electronic scales, precise weight measurement and assessment of results
- A High School diploma/or equivalent or higher education and/or experience considered
